AI-Workforce Enablement and Readiness Assessment

People/Execution Leader 360 Feedback Report

360 ASSESSMENT

Participant: Elena Sample

Role: Engineering Manager, Platform Services

Date: Sample Report

Report Type: People/Execution Leader 360 Assessment
+ AI Fluency Knowledge Check

1 Introduction

This report presents the results of your AI-Workforce Transformation Readiness 360 assessment. It combines your self-assessment with feedback from your Manager, Direct Reports, Peers, and Stakeholders & Other Management.

The purpose of this feedback is developmental. It is designed to help you confirm strengths that are visible to others, identify gaps between how you see yourself and how others experience your leadership, understand where you may be underestimating important capabilities, and build a focused development plan that supports both your growth and the organization's AI transformation.

Feedback is most powerful when treated as information rather than judgment. Use this report to reflect, discuss with a trusted coach or manager, and set meaningful priorities.

2 About the Raters

Rater Group	Number of Responses
Self	1
Manager	1
Direct Reports	7
Peers	4
Stakeholders & Other Management	4
Total Others	16

Note on anonymity

Manager scores are shown individually. Scores from Direct Reports, Peers, and Stakeholders & Other Management are averaged to protect individual anonymity. High variation within a group (shown via Range) indicates that not all raters saw the same behavior.

3 How to Read This Report

Term	Meaning
Self	Your own rating
Others	Average of all rater groups excluding Self
Gap	Self score minus Others average. Positive = you rate yourself higher
Blind Spot	Self significantly higher than Others (gap $\geq +0.7$)
Latent Power	Others significantly higher than Self (gap ≤ -0.7)
Aligned	Gap of 0.3 or less
Range	Lowest to highest score given by raters in that group

Module	Self	Others	Gap	Pattern
AI People Leadership & Execution	4.31	3.41	+0.9	Blind Spot
Ability for Change	4.15	4.02	+0.13	Aligned
Change Readiness	4.05	3.94	+0.11	Aligned
Organizational & Team Enablers	3.45	3.71	-0.26	Aligned
Psychological & Motivational Readiness	4.27	4.26	+0.01	Aligned
Overall Average	4.05	3.87	+0.18	Aligned

Key Insights

- Your clearest Blind Spot is AI People Leadership & Execution: you rate your own coaching and champion-building meaningfully higher than Manager, Direct Reports, Peers, and Stakeholders currently experience it.
- Your clearest Latent Power is Enablers — Created on the Team: every rater group sees a safer, more consistently-sharing team environment than you give yourself credit for building.
- Ability for Change, Change Readiness, and Psychological & Motivational Readiness are all Aligned — your adaptability, your read on team readiness, and your own mindset are consistently corroborated by every rater group.

What Jumps Out

AI People Leadership & Execution is this report's headline Blind Spot (Self 4.31, Others 3.41, gap +0.90) — unpacked fully in Module A below, where two specific competencies drive nearly all of the gap.

Enablers — Created on the Team is the mirror-image Latent Power (Self 3.3, Others 4.15 — see Module D2): raters consistently describe a safer, more consistently-sharing team environment than you rate yourself as having built.

The combined Organizational & Team Enablers figure in the table above (Self 3.45, Others 3.71) reads as Aligned — but that single number hides a real split: Module D1 (inherited conditions) and Module D2 (what you've built on the team) pull in opposite directions, and only Module Detail below shows both halves.

5 Overall Readiness Profile

Figure 1. Overall Readiness Profile — Self vs Others

6 Module Detail

Module A — AI People Leadership & Execution*

The manager behaviors required to turn AI strategy into team results, across 7 competencies.

* Adapted for team-level execution and coaching per the People Leaders & Execution Managers Handbook, building on the AI leadership framework in Kent Kaufman's AI L4IR: Leadership and the Fourth Industrial Revolution.

Figure 2. AI People Leadership & Execution — Self vs. Manager, Direct Reports, Peers & Stakeholders

Self 4.31 Others 3.41 Gap +0.9 Blind Spot

Key Insights — Module A

- AI People Leadership & Execution is this report's clearest Blind Spot (Self 4.31, Others 3.41, gap +0.90). The gap is not spread evenly across all seven competencies — it concentrates almost entirely in two: Coaches People to Work with AI (Self 4.1 vs. Others 2.9) and Builds Local Champions and Peer Networks (Self 4.0 vs. Others 2.4). The other five competencies, including Models AI-Enabled Personal Productivity (your single highest-rated item), are much closer to Aligned.

Figure 3. Module A — Largest Blind Spots

Definitions

- **Translates AI Strategy into Team Priorities:** Converts AI intent into team goals, trade-offs, and near-term work.
- **Coaches People to Work with AI:** Develops others' skill, judgment, and confidence.
- **Models AI-Enabled Personal Productivity:** Uses AI in real work and makes that use teachable.
- **Runs AI-Enabled Execution:** Specs, owners, review, measurement, and stopping low-value work.
- **Creates Team Psychological Safety for AI Experimentation:** Makes it safe to try, fail, question, and share.
- **Builds Local Champions and Peer Networks:** Spreads adoption through people on and beyond the team.
- **Owns Outcomes and Responsible Use:** Accountability for results, quality, privacy, and appropriate use.

Module B — Ability for Change

Personal capacity to adapt, learn, and remain effective during AI-driven change. A single flat scale.

Figure 4. Ability for Change — Self vs. Manager, Direct Reports, Peers & Stakeholders

Self 4.15 Others 4.02 Gap +0.13 Aligned

Key Insights — Module B

- Ability for Change is Aligned (Self 4.15, Others 4.02, gap +0.13). Every rater group, including you, places Learning new AI skills under time pressure as the comparative soft spot in an otherwise strong, consistently-rated module.

Figure 5. Module B — Largest Self–Others Gaps

Definitions

- Ability for Change:** Personal capacity to adapt, learn, and remain effective during AI-driven change.

Module C — Change Readiness (Team Level)

Holt et al.'s four readiness beliefs, applied at the team level.

Figure 6. Change Readiness — Self vs. Manager, Direct Reports, Peers & Stakeholders

Self 4.05 Others 3.94 Gap +0.11 Aligned

Key Insights — Module C

- Change Readiness is Aligned (Self 4.05, Others 3.94, gap +0.11) at the team level. Belief 4 and Appropriateness are rated highest by every group; Belief 2 — whether your manager and the wider system will actually unblock this team's AI work — is the one belief every rater group, including you, rates distinctly lower.

Definitions

- Appropriateness:** Belief that AI is the right priority for this team's work right now.

Belief 2–4: definitions withheld from this sample report to protect the instrument's full item wording.

Module D1 — Organizational & Team Enablers (Inherited from the Organization)

Conditions this team inherits from the wider organization rather than creates itself. A single flat scale.

Figure 7. Enablers — Inherited — Self vs. Manager, Direct Reports, Peers & Stakeholders

Self 3.6 Others 3.28 Gap +0.32 Mixed

Key Insights — Module D1

- Enablers — Inherited from the Organization comes out essentially Aligned, trending slightly toward your own view (Self 3.6, Others 3.28, gap +0.32 — just outside the Aligned band, not a Blind Spot). Enabler 2 is the lowest-rated item here from every rater group, including yours — this module's weakest point is shared, not a perception gap.

Definitions

- Enablers — Inherited from the Organization:** Conditions this team inherits from the wider organization: AI direction clarity, resourcing, visible senior alignment, usable practice-sharing from other teams, and clear data/tool/acceptable-use policy.

Module D2 — Organizational & Team Enablers (Created on the Team)

Conditions this manager and team create for themselves, regardless of what the wider organization provides. A single flat scale.

Figure 8. Enablers — Created on the Team — Self vs. Manager, Direct Reports, Peers & Stakeholders

Self 3.3 Others 4.15 Gap -0.85 Latent Power

Key Insights — Module D2

- Enablers — Created on the Team is this report's clearest Latent Power (Self 3.3, Others 4.15, gap -0.85). Every item shows the same direction: Enabler 2 shows the widest spread (Self 3.0 vs. Others 4.0), suggesting you may not recognize your own role in building that champion presence.

Definitions

- Enablers — Created on the Team:** Conditions this manager and team create for themselves: psychological safety to experiment, an active local champion, systematic sharing of what works, protected learning time, and AI-use standards that are actually followed.

Module E — Psychological & Motivational Readiness

Internal mindset and motivational factors that influence engagement with AI, across 3 competencies.

Figure 9. Psychological & Motivational Readiness — Self vs. Manager, Direct Reports, Peers & Stakeholders

Self 4.27 Others 4.26 Gap +0.01 Aligned

Key Insights — Module E

- Psychological & Motivational Readiness is Aligned and essentially at parity (Self 4.27, Others 4.26, gap +0.01) — the strongest agreement of any module in this report. Learning Orientation is the clear strength across every rater group.

Definitions

- **Learning Orientation:** Seeking out new ways of working with AI rather than waiting to be trained.

Factor 2-3: definitions withheld from this sample report to protect the instrument's full item wording.

AI Fluency Knowledge Check

Overall Fluency Score: 22 of 25 correct (88%)

Form C. This is an objective knowledge check, not a self-rating, and is reported separately from Modules A–E.

Appendix B describes the question-by-question format; the actual questions and answer key are omitted from this sample report.

Calibration note: Your demonstrated Fluency (88%) is the single highest figure in this report — ahead of every module average, Self or Others. It is a genuine strength, not just a self-perception; worth drawing on directly when coaching others on technical AI concepts (Module A's Coaches People to Work with AI item), since the gap there is about visible coaching behavior, not underlying knowledge.

8

Priority Development Themes

1

Close the AI People Leadership & Execution gap (Blind Spot), starting with two items. Coaches People to Work with AI and Builds Local Champions and Peer Networks carry almost all of this module's gap. Ask two or three Direct Reports what visible coaching or champion-building would look like from where they sit — their answer is likely to be more concrete than the current self-rating.

2

Own your Latent Power in Enablers — Created on the Team. You are underestimating the safety and sharing culture you've already built. Naming this explicitly — rather than treating it as a lucky team dynamic — makes it something you can intentionally extend, including to the champion-building gap above.

3

Watch for overuse on Models AI-Enabled Personal Productivity. This is your single highest self-rated item in Module A (4.7) and also closely Aligned with Others — a genuinely strong, well-corroborated behavior. The risk at this level of confidence is assuming your own strong personal use automatically transfers into coaching skill for others, which the Module A gap suggests it has not, yet.

4

Protect what is already working. Ability for Change, Change Readiness, and Psychological & Motivational Readiness are all strong and Aligned — treat these as a stable platform while you work the two sharper gaps above.

Simulated rater comments that support the quantitative patterns above.

Comments Supporting the Blind Spot

- *“Elena talks about coaching the team on AI tools, but in practice it's mostly a few links shared in Slack. I'd like more hands-on time.”*
- *“She thinks there's a champion network beyond her. Honestly, when something AI-related comes up, people still just go straight to her.”*

Comments Supporting the Latent Power

- *“This is the safest team I've been on for trying something with AI and having it not work. Elena doesn't seem to realize how rare that is.”*
- *“We actually share what works across the team pretty consistently. I don't think she gives herself credit for setting that up.”*

Comments Supporting Alignment

- *“When priorities shift, Elena adjusts fast and keeps the team moving. Everyone would say the same thing.”*
- *“There's no gap between how she talks about AI being worth it for this team and how the team actually feels about it.”*

10 Suggested Next Steps

- 1 Review this report with a coach or trusted colleague.** A second perspective is especially useful given how concentrated the Module A gap is in just two competencies.
- 2 Select one Blind Spot action and one Latent Power action for the next 90 days.** Trying to work every finding at once dilutes attention from the two patterns that matter most here.
- 3 Ask two or three Direct Reports for specific coaching examples.** Behavioral specifics on Coaches People to Work with AI and Builds Local Champions and Peer Networks will do more than another round of scores to clarify the gap.
- 4 Complete the Keep / Start / Stop worksheet below.** Use it to turn the Priority Development Themes into a small number of concrete commitments rather than a longer list of good intentions.

Keep / Start / Stop

Reflecting on the patterns above — the AI People Leadership & Execution Blind Spot, the Enablers Latent Power, and the three Aligned modules — note what you will keep doing, start doing, and stop doing over the next 90 days.

Keep	Start	Stop

Appendix A — Locked Data Tables

In a delivered report, this appendix is the single source of truth for every score in the report: one locked data table per module, listing each item's exact wording alongside your Self rating, your Manager's rating, and the Direct Reports / Peers / Stakeholders group averages and ranges — 30 items across Modules A, B, C, D1, D2, and E in all. It is omitted from this sample report so the instrument's full item wording is not disclosed.

Appendix B — AI Fluency Knowledge Check Detail

In a delivered report, this appendix lists every question from Form C alongside the participant's answer, the correct answer, and whether it was answered correctly — all 25 questions. It is omitted from this sample report so the assessment's questions and answer key are not disclosed.

Overall Fluency: 22 / 25 correct = 88%

Appendix C — Components Being Measured

In a delivered report, this appendix defines every component measured across Modules A, B, C, D1, D2, and E — 17 definitions in all. It is omitted from this sample report so the instrument's full component list is not disclosed; a module's own relevant definitions still appear in Section 6, next to that module's actual chart.

Appendix D — Respondent & Rater Details

Field	Value
Access Code	PL360-SAMPLE-01
Respondent Email	elena.sample@example.com
Product Line	People/Execution Leader
Job Title	Engineering Manager, Platform Services
Fluency Form	C
Total Raters (incl. Self)	17
