AI-Workforce Enablement and Readiness Assessment

Senior Leader 360 Feedback Report

360 ASSESSMENT

Participant: Samuel Sample

Role: EVP, Commercial Operations

Date: Sample Report

Report Type: Senior Leader 360 Assessment
+ AI Fluency Knowledge Check

1 Introduction

This report presents the results of your AI-Workforce Transformation Readiness 360 assessment. It combines your self-assessment with feedback from your Manager, Direct Reports, Peers, and Stakeholders & Other Management.

The purpose of this feedback is developmental. It is designed to help you confirm strengths that are visible to others, identify gaps between how you see yourself and how others experience your leadership, understand where you may be underestimating important capabilities, and build a focused development plan that supports both your growth and the organization's AI transformation.

Feedback is most powerful when treated as information rather than judgment. Use this report to reflect, discuss with a trusted coach or manager, and set meaningful priorities.

2 About the Raters

Rater Group	Number of Responses
Self	1
Manager	1
Direct Reports	8
Peers	5
Stakeholders & Other Management	6
Total Others	20

Note on anonymity

Manager scores are shown individually. Scores from Direct Reports, Peers, and Stakeholders & Other Management are averaged to protect individual anonymity. High variation within a group (shown via Range) indicates that not all raters saw the same behavior.

3 How to Read This Report

Term	Meaning
Self	Your own rating
Others	Average of all rater groups excluding Self
Gap	Self score minus Others average. Positive = you rate yourself higher
Blind Spot	Self significantly higher than Others (gap $\geq +0.7$)
Latent Power	Others significantly higher than Self (gap ≤ -0.7)
Aligned	Gap of 0.3 or less
Range	Lowest to highest score given by raters in that group

Module	Self	Others	Gap	Pattern
AI Leadership Competencies	3.8	3.63	+0.17	Aligned
Change Agility	4.1	3.97	+0.13	Aligned
Change Readiness	4.3	4.18	+0.12	Aligned
Organizational Enablers	4.0	2.98	+1.02	Blind Spot
Psychological & Motivational Readiness	3.5	4.29	-0.79	Latent Power
Overall Average	3.94	3.81	+0.13	Aligned

Key Insights

- Your clearest Blind Spot is Organizational Enablers: you rate the conditions you and the top team have built (resourcing, champion networks, systematic sharing of AI wins) well above how every other rater group currently experiences them.
- Your clearest Latent Power is Psychological & Motivational Readiness: Manager, Direct Reports, Peers, and Stakeholders all rate your composure and learning orientation under pressure higher than you rate yourself, especially on Response to Ambiguity & Pressure.
- AI Leadership Competencies, Change Agility, and Change Readiness are all Aligned (gaps of 0.2 or less) — there is broad agreement that your vision, your personal adaptability, and your read on organizational readiness are accurately calibrated.

What Jumps Out

Organizational Enablers is the one module where your self-rating (4.0) and what every rater group reports (2.98 average) pull apart by a full point — that Blind Spot is this report's headline pattern, unpacked fully in Module D below.

The mirror image shows up in Module E: raters consistently rate your composure under ambiguity and pressure higher than you rate yourself (4.29 vs. 3.5) — a Latent Power worth naming on its own, not just as a footnote to the Module D gap.

Three of five modules — A, B, and C — are tightly Aligned (gaps of 0.2 or less), which is itself informative: the two gaps that do exist are specific and real, not an artifact of generally noisy or disagreeing raters.

5 Overall Readiness Profile

Figure 1. Overall Readiness Profile — Self vs Others

6 Module Detail

Module A — AI Leadership Competencies

The specific senior leadership behaviors required to drive successful AI transformation, across 7 competencies.

Figure 2. AI Leadership Competencies — Self vs. Manager, Direct Reports, Peers & Stakeholders

Self 3.8 Others 3.63 Gap +0.17 Aligned

Key Insights — Module A

- AI Leadership Competencies is Aligned overall (Self 3.8, Others 3.63, gap +0.17) — there is broad agreement on where your AI leadership is strongest (AI-Enabled Personal Productivity, Industry Disruption & Competitive Advantage) and where it is still developing (AI-First Business Processes, Products & Services is the lowest-rated item from every rater group, including your own).

Figure 3. Module A — Largest Self–Others Gaps

Definitions

- **AI-Visionary Leadership:** Ability to articulate how AI creates strategic advantage and inspire others with a clear AI-enabled future.
- **AI-Enabled Personal Productivity:** Regular personal use of AI tools to produce real work and model productive adoption.
- **AI Scaled Agile Leadership:** Translating AI vision into executable priorities while balancing speed and governance.
- **AI Organizational Transformation:** Driving a clear current-state view, roadmap, and sustained organizational priority for AI.
- **AI-First Business Processes, Products & Services:** Embedding AI into core work rather than treating it as an add-on.
- **Industry Disruption & Competitive Advantage:** Staying ahead of AI-driven industry shifts and building distinctive advantage.
- **AI Champions and Their Networks:** Building and supporting networks of champions who spread adoption beyond formal hierarchy.

Module B — Change Agility

Personal capacity to adapt, learn, and remain effective during AI-driven change. A single flat scale.

Figure 4. Change Agility — Self vs. Manager, Direct Reports, Peers & Stakeholders

Self 4.1 Others 3.97 Gap +0.13 Aligned

Key Insights — Module B

- Change Agility is Aligned (Self 4.1, Others 3.97, gap +0.13). Every rater group, including you, places Learning new AI skills under time pressure as the relative soft spot in an otherwise strong module — a rare case where self-perception and the organization's view land on the exact same item.

Figure 5. Module B — Largest Self-Others Gaps

Definitions

- Change Agility:** Personal capacity to adapt, learn, and remain effective during AI-driven change.

Module C — Change Readiness (Enterprise Level)

Holt et al.'s four readiness beliefs, applied at the enterprise level.

Figure 6. Change Readiness — Self vs. Manager, Direct Reports, Peers & Stakeholders

Self 4.3 Others 4.18 Gap +0.12 Aligned

Key Insights — Module C

- Change Readiness is Aligned (Self 4.3, Others 4.18, gap +0.12), the strongest and most agreed-upon module in this report. Appropriateness and Change Efficacy are rated highest by every group; Management Support, while still solid, is the comparatively softer belief across the board.

Definitions

- **Appropriateness:** Belief that accelerating AI adoption is the right strategic priority for the organization now.
- **Management Support:** Belief that senior leaders are actually committed — not merely interested.
- **Change Efficacy:** Belief that the organization has, or can build, the ability to implement AI at the intended scale.
- **Personal Valence:** Belief that the change brings personal or organizational benefit.

Module D — Organizational Enablers

The supporting conditions the top team must create if AI transformation is to succeed. A single flat scale.

Figure 7. Organizational Enablers — Self vs. Manager, Direct Reports, Peers & Stakeholders

Self 4.0 Others 2.98 Gap +1.02 Blind Spot

Key Insights — Module D

- Organizational Enablers is this report's clearest Blind Spot (Self 4.0, Others 2.98, gap +1.02 — the largest gap of any module). The pattern is consistent across every item: you rate the conditions you've helped build meaningfully higher than Manager, Direct Reports, Peers, and Stakeholders experience them, with the widest individual gaps on Active network of AI champions exists and Successful AI use cases systematically shared.

Definitions

- Organizational Enablers:** The supporting conditions the top team must create if AI transformation is to succeed.

Module E — Psychological & Motivational Readiness

Internal mindset and motivational factors that influence engagement with AI, across 3 competencies.

Figure 8. Psychological & Motivational Readiness — Self vs. Manager, Direct Reports, Peers & Stakeholders

Self 3.5 Others 4.29 Gap -0.79 Latent Power

Key Insights — Module E

- Psychological & Motivational Readiness is this report's clearest Latent Power (Self 3.5, Others 4.29, gap – 0.79). Response to Ambiguity & Pressure shows the widest spread — you rate yourself at 2.9 on staying constructive under uncertain or imperfect AI outcomes, while every rater group places you a full point or more higher.

Definitions

- **Learning Orientation:** Seeking out new ways of working with AI rather than waiting to be trained.
- **Response to Ambiguity & Pressure:** Staying constructive and effective when AI outputs or requirements are imperfect or changing.
- **AI-Related Drivers & Values:** Underlying beliefs about whether AI primarily creates opportunity or threat.

AI Fluency Knowledge Check

Overall Fluency Score: 19 of 25 correct (76%)

Form C. This is an objective knowledge check, not a self-rating, and is reported separately from Modules A–E.

Appendix B describes the question-by-question format; the actual questions and answer key are omitted from this sample report.

Calibration note: Your demonstrated Fluency (76%) sits comfortably mid-pack relative to your module scores — neither the standout strength nor the clear gap in this report. The more notable calibration story here is the Module D / Module E pair above, not Fluency.

8

Priority Development Themes

1

Close the Organizational Enablers gap (Blind Spot). Every rater group sees less consistent resourcing, champion-network reach, and systematic sharing of AI wins than you do. Ask two or three Direct Reports and Stakeholders directly what “adequate time, budget, and talent” or “a real champion network” would look like in practice — their answer is likely to be more concrete and more critical than your own self-rating.

2

Own your Latent Power in Psychological & Motivational Readiness. You are underestimating how composed and constructive others see you under ambiguity and pressure. This is worth naming explicitly in how you talk about your own development — not just a flattering gap to set aside, since under-claiming this strength can also mean under-using it as a deliberate, visible leadership tool during AI-related setbacks.

3

Watch for overuse on your most confident self-ratings. Several of your highest self-ratings in Module D (AI vision and roadmap communicated clearly: 4.4; Managers have authority to run AI work without re-approval: 4.5) are exactly where the gap to Others is widest. A strength held with high confidence and little outside checking is also the strength most at risk of tipping into overuse — in this case, mistaking your own conviction that the message has landed for evidence that it actually has.

4

Protect and extend what is already working. Change Readiness and Change Agility are both strong and Aligned — treat these as a stable platform to build from while you work the two gaps above, not areas that need additional attention right now.

Simulated rater comments that support the quantitative patterns above.

Comments Supporting the Blind Spot

- *"He talks about the champion network like it already covers the organization. From where I sit, it's still three or four names we all already knew."*
- *"The roadmap is clear to him and to the top team. By the time it reaches my level, a lot of that clarity has been lost."*

Comments Supporting the Latent Power

- *"When an AI pilot goes sideways, Samuel is the calmest person in the room. He doesn't give himself enough credit for that."*
- *"He second-guesses how well he handles the messy, unclear stretches. In practice, that's exactly when he's at his best."*

Comments Supporting Alignment

- *"There's no daylight between how Samuel sees the AI opportunity and how the rest of us do. That shared view makes a real difference."*
- *"He adapts quickly when something doesn't work. That part of how he operates is consistent, whoever you ask."*

10 Suggested Next Steps

- 1 Review this report with a coach or trusted colleague.** A second perspective is especially useful for a report with one Blind Spot and one Latent Power this clearly defined.
- 2 Select one Blind Spot action and one Latent Power action for the next 90 days.** Trying to work every finding at once dilutes attention from the two patterns that matter most here.
- 3 Ask two or three Direct Reports and Stakeholders for specific examples.** Behavioral specifics on Organizational Enablers will do more than another round of scores to clarify what “adequate” would look like.
- 4 Complete the Keep / Start / Stop worksheet below.** Use it to turn the Priority Development Themes into a small number of concrete commitments rather than a longer list of good intentions.

Keep / Start / Stop

Reflecting on the patterns above — the Organizational Enablers Blind Spot, the Psychological & Motivational Readiness Latent Power, and the three Aligned modules — note what you will keep doing, start doing, and stop doing over the next 90 days.

Keep	Start	Stop

Appendix A — Locked Data Tables

Locked Data Tables — the single source of truth for every score used in this report and its charts. Manager is shown individually; Direct Reports, Peers, and Stakeholders & Other Management are each shown as a group average with a range, to protect individual anonymity.

Module A — AI Leadership Competencies — Locked Data Table

Item	Self	Mgr	DR Avg (Range)	Peers Avg (Range)	Stakeholder Avg (Range)
AI-Visionary Leadership	4.1	3.9	3.7 (3.2–4.2)	3.9 (3.4–4.3)	3.7 (3.2–4.2)
AI-Enabled Personal Productivity	4.4	4.5	4.4 (4.0–4.9)	4.5 (4.0–5.0)	4.2 (3.8–4.7)
AI Scaled Agile Leadership	3.7	3.6	3.4 (2.9–3.9)	3.5 (3.0–4.0)	3.5 (3.0–4.0)
AI Organizational Transformation	3.6	3.4	3.4 (2.9–3.9)	3.6 (3.1–4.0)	3.4 (2.9–3.9)
AI-First Business Processes, Products & Services	3.3	3.1	3.2 (2.8–3.7)	3.3 (2.8–3.8)	3.0 (2.5–3.5)
Industry Disruption & Competitive Advantage	4.0	4.0	3.9 (3.4–4.3)	3.9 (3.4–4.3)	3.7 (3.2–4.2)
AI Champions and Their Networks	3.5	3.4	3.2 (2.8–3.7)	3.2 (2.8–3.7)	3.1 (2.6–3.6)

Module B — Change Agility — Locked Data Table

Item	Self	Mgr	DR Avg (Range)	Peers Avg (Range)	Stakeholder Avg (Range)
Quickly adjusts approach when obstacles arise	4.4	4.4	4.3 (3.8–4.8)	4.4 (4.0–4.9)	4.3 (3.8–4.8)
Learns new AI skills under time pressure	3.6	3.7	3.8 (3.3–4.2)	3.7 (3.2–4.2)	3.6 (3.1–4.0)
Remains effective amid high ambiguity	4.0	4.0	3.9 (3.4–4.3)	4.0 (3.5–4.5)	3.8 (3.3–4.2)
Helps others stay productive when path is unclear	4.1	4.1	3.8 (3.3–4.2)	3.9 (3.4–4.3)	3.9 (3.4–4.3)
Breaks complex work into manageable steps	4.5	4.2	4.2 (3.8–4.7)	4.2 (3.8–4.7)	4.2 (3.8–4.7)
Recovers and refocuses quickly after setbacks	4.0	3.8	3.7 (3.2–4.2)	3.8 (3.3–4.2)	3.6 (3.1–4.0)

Module C — Change Readiness (Enterprise Level) — Locked Data Table

Item	Self	Mgr	DR Avg (Range)	Peers Avg (Range)	Stakeholder Avg (Range)
Appropriateness	4.6	4.4	4.6 (4.1–5.0)	4.6 (4.1–5.0)	4.5 (4.0–5.0)
Management Support	3.9	3.7	3.8 (3.3–4.2)	3.7 (3.2–4.2)	3.7 (3.2–4.2)
Change Efficacy	4.4	4.4	4.3 (3.8–4.8)	4.3 (3.8–4.8)	4.3 (3.8–4.8)
Personal Valence	4.3	4.3	4.2 (3.8–4.7)	4.1 (3.6–4.5)	4.0 (3.5–4.5)

Module D — Organizational Enablers — Locked Data Table

Item	Self	Mgr	DR Avg (Range)	Peers Avg (Range)	Stakeholder Avg (Range)
AI vision and roadmap communicated clearly	4.4	3.2	3.2 (2.8–3.7)	3.2 (2.8–3.7)	3.4 (2.9–3.9)
Adequate time, budget, and talent allocated	3.8	2.9	2.7 (2.2–3.2)	2.9 (2.4–3.4)	2.7 (2.2–3.2)
People feel safe to experiment with AI	4.3	3.5	3.3 (2.8–3.8)	3.4 (2.9–3.9)	3.2 (2.8–3.7)
Top team visibly aligned on AI priorities	4.2	2.9	2.8 (2.3–3.2)	3.0 (2.5–3.5)	2.9 (2.4–3.4)
Active network of AI champions exists	3.9	2.6	2.5 (2.0–3.0)	2.8 (2.3–3.2)	2.5 (2.0–3.0)
Successful AI use cases systematically shared	3.7	2.6	2.5 (2.0–3.0)	2.6 (2.1–3.1)	2.7 (2.2–3.2)
Policies on data, tools, and acceptable use are clear	4.1	3.4	3.2 (2.8–3.7)	3.2 (2.8–3.7)	3.2 (2.8–3.7)
Learning time is protected, not only delivery time	3.6	2.9	2.8 (2.3–3.2)	3.0 (2.5–3.5)	2.8 (2.3–3.2)
Failures as well as wins are captured so the org learns	3.5	2.6	2.7 (2.2–3.2)	2.8 (2.3–3.2)	2.6 (2.1–3.1)
Managers have authority to run AI work without re-approval	4.5	3.5	3.6 (3.1–4.0)	3.5 (3.0–4.0)	3.5 (3.0–4.0)

Module E — Psychological & Motivational Readiness — Locked Data Table

Item	Self	Mgr	DR Avg (Range)	Peers Avg (Range)	Stakeholder Avg (Range)
Learning Orientation	3.9	4.4	4.5 (4.0–5.0)	4.5 (4.0–5.0)	4.2 (3.8–4.7)
Response to Ambiguity & Pressure	2.9	3.9	3.8 (3.3–4.2)	4.1 (3.6–4.5)	3.9 (3.4–4.3)

Item	Self	Mgr	DR Avg (Range)	Peers Avg (Range)	Stakeholder Avg (Range)
AI-Related Drivers & Values	3.7	4.5	4.6 (4.1-5.0)	4.7 (4.2-5.0)	4.4 (4.0-4.9)

Appendix B — AI Fluency Knowledge Check Detail

In a delivered report, this appendix lists every question from Form C alongside the participant's answer, the correct answer, and whether it was answered correctly — all 25 questions. It is omitted from this sample report so the assessment's questions and answer key are not disclosed.

Overall Fluency: 19 / 25 correct = 76%

Appendix C — Components Being Measured

Module A — AI Leadership Competencies

Definitions

- **AI-Visionary Leadership:** Ability to articulate how AI creates strategic advantage and inspire others with a clear AI-enabled future.
- **AI-Enabled Personal Productivity:** Regular personal use of AI tools to produce real work and model productive adoption.
- **AI Scaled Agile Leadership:** Translating AI vision into executable priorities while balancing speed and governance.
- **AI Organizational Transformation:** Driving a clear current-state view, roadmap, and sustained organizational priority for AI.
- **AI-First Business Processes, Products & Services:** Embedding AI into core work rather than treating it as an add-on.
- **Industry Disruption & Competitive Advantage:** Staying ahead of AI-driven industry shifts and building distinctive advantage.
- **AI Champions and Their Networks:** Building and supporting networks of champions who spread adoption beyond formal hierarchy.

Module B — Change Agility

Definitions

- **Change Agility:** Personal capacity to adapt, learn, and remain effective during AI-driven change.

Module C — Change Readiness (Enterprise Level)

Definitions

- **Appropriateness:** Belief that accelerating AI adoption is the right strategic priority for the organization now.
- **Management Support:** Belief that senior leaders are actually committed — not merely interested.
- **Change Efficacy:** Belief that the organization has, or can build, the ability to implement AI at the intended scale.
- **Personal Valence:** Belief that the change brings personal or organizational benefit.

Module D — Organizational Enablers

Definitions

- **Organizational Enablers:** The supporting conditions the top team must create if AI transformation is to succeed.

Module E — Psychological & Motivational Readiness

Definitions

- **Learning Orientation:** Seeking out new ways of working with AI rather than waiting to be trained.
- **Response to Ambiguity & Pressure:** Staying constructive and effective when AI outputs or requirements are imperfect or changing.
- **AI-Related Drivers & Values:** Underlying beliefs about whether AI primarily creates opportunity or threat.

Appendix D — Respondent & Rater Details

Field	Value
Access Code	SL360-SAMPLE-01
Respondent Email	samuel.sample@example.com
Product Line	Senior Leader
Job Title	EVP, Commercial Operations
Fluency Form	C
Total Raters (incl. Self)	21
